This application was filed under Rule 371 and contains multiple inventions with different technical features. Applicants must select a single method only. Please update the continuing information in the specification. The priority documents have been received. The preliminary amendment received 2/27/02 has been entered and claims 33-56 are currently pending in this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-40, drawn to a method for identifying antiparasitic agents that are phosphatase inhibitors, classified in class 435, subclass 21.
- II. Claims 41-46, drawn to a compound found by the method of Group I, unclassifiable.
- III. Claims 47-51, drawn to a method of increasing phosphate content, unclassifiable.
- IV. Claims 52-56, drawn to a method of treating, unclassifiable.

The inventions are distinct, each from the other because:

Three independent methods are presented each with different technical features.

Group I requires an assay for phosphatase activity inhibition. Group II is directed to a compound but no compound is described in any standard fashion. Group II is a method of increasing content of a phosphate in a living organism by inhibiting phosphatase in some fashion. Group IV is a method of treating with a compound which is not described in any standard fashion beyond function. There is no common technical feature found in the above Groups.

Art Unit: 1651

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
